

和18题一样，只不过这回变成了referers

```
{
$username = check_input($con, $_POST['uname']);
$password = check_input($con, $_POST['passwd']);

/*
echo 'Your User name:'. $uname;
echo "<br>";
echo 'Your Password:'. $passwd;
echo "<br>";
echo 'Your User Agent String:'. $uagent;
echo "<br>";
echo 'Your User Agent String:'. $IP;
*/

//logging the connection parameters to a file for analysis.
$f = fopen('result.txt','a');
fwrite($f, 'Referer:'. $uname. "\n");
fclose($f);

$sql="SELECT users.username, users.password FROM users WHERE users.username=$username and users.password=$password ORDER BY users.id DESC
LIMIT 0,1";
$result1 = mysqli_query($con, $sql);
$row1 = mysqli_fetch_array($result1, MYSQLI_BOTH);
if($row1)
{
echo '<font color= "#FFFF00" font size = 3 >';
$insert="INSERT INTO 'security'. 'referers' ('referer', 'ip_address') VALUES ('$uagent', '$IP')";
mysqli_query($insert);
//echo "Your IP ADDRESS is: ' . $IP;
echo "</font>";
//echo "<br>";
echo '<font color= "#0000ff" font size = 3 >';
echo 'Your Referer is: ' . $uagent;
```
